The fine print. All products listed in this catalog are sold without representation or warranty, either expressed or implied. It is the buyer's responsibility to determine the suitability of any product for the intended use. Wild Side North, therefore, does not guarantee the results obtained through the use of the products sold. Prices are subject to change without notice. Goods will be shipped at prices in effect at the time of shipment. 50% UPS Freight offer may be discontinued or modified at any time without notice. Past due accounts are not eligible for 50% UPS Freight program.

Vinyl Equipment and Accessories

24" FOISON VINYL CUTTING DESKTOP PLOTTER

Quality Stepper Motor with adjustable 50-800g Downforce. The C-24 can cut thin textile media to the thickest reflective medias. The perfect machine to cut vinyl heat applied textile graphics. Create custom in-house numbers and names on team uniforms. The software allows you to utilize any font installed on your computer for a custom look. Comes with everything you need to get started including Flexi Starter Cutting Software, cutting blades, USB connection cord, installation manual, user manual, and one year warranty. The integrated LCD control panel makes cutting easy with its push button interface.

PC Compatible with Windows XP or newer. *(This is not a P-Cut.)* *Ships UPS.*
MAC Compatible with OSX 10.2.8 or higher.
Manufacturer list price: $900.

$699.95

24" Plotter Stand

Quality stand with casters. **$149**

Foison Replacement Blades

Offers superior cutting of the most intricate designs. Excellent for textile, sign and other thin media. Available in 45 and 60 degree cutting angles for various substrates.
Please specify style of blade.

	EA	3 (EA)
45 Degree Blade	$12.99	$ 9.99
60 Degree Blade	14.99	11.99

Siser Weeder

Allows you to weed quickly and accurately, even when cutting small details.

$14.99

Siser Squeegee

Squeegee helps to quickly and accurately lay down the masking tape without leaving air bubbles. Remove trapped air and create a bond between the mask and the image.

$1.49

Teflon Sheet

For heat pressed vinyl, lettering and transfer applications. If you only buy one cover sheet, make sure it's this one. A teflon cover sheet protects your garment and the upper platen. The teflon sheet is reusable and will give your image a semi-gloss finish. Size: 18" x 20"

$12

CAD Cut Heat Applied Textile Vinyl

EasyWeed by Siser

EasyWeed is a ready-to-cut material designed for custom garment decoration. EasyWeed's pressure sensitive carrier allows you to weed small letters and fine designs easily. EasyWeed offers excellent durability. It's great for player names and numbers. Because of its thinness, it's extremely easy to cut, weed, and heat apply. Perfect for single color and multi-layered applications. Use on 100% polyester, 100% cotton, and all poly/cotton blends. Cut design in reverse. Heat Applications: Preheat garment to 302 F. Heat apply for 10-15 seconds. Peel Hot.

1. Cut Vinyl

2. Weed Vinyl

3. Heat Press

4. Peel Hot

CAD Cut Heat Applied Textile Vinyl

Reflect-ALL by Siser

The state of the art in polyurethane reflective, ready-to-cut materials. Reflect-ALL has higher reflectivity due to its patented glass bead construction. Cuts and weeds easily and can be applied to most textile surfaces. To Apply With Heat Press: *Remove pink liner from adhesive side and cut design in reverse. Preheat garment to 305 F. Heat apply for 5 seconds. Peel hot. Cover with teflon sheet. Heat for 5 seconds.*

Colors	20" x 5 YD Roll	20" x 10 YD Roll
Reflective Silver	**$145.88**	**$285.92**
Reflective Yellow	**140.04**	**285.92**

Use on 100% Poly, 100% Cotton, Poly/Cotton Blends, Lycra, most Nylon, Spandex and Leather.

VideoFlex by Siser

Ready to cut material is excellent for custom garment decoration, especially team jerseys. With high opacity and matte finish, it is used by many professional sport leagues. The hand remains soft even after many machine washings. *Cut design in reverse, preheat garment to 300° F, heat apply 300° for 10-15 seconds, PEEL COLD.*

Colors	15" x 5 YD Roll	15" x 10 YD Roll
Black, Green, Navy, Red, Royal, White, Yellow	**$39.73**	**$77.84**

Use: 100% Polyester, 100% Cotton, and Poly/Cotton Blends.

Digital Heat Applied Vinyl

ColorPrint Crystal by Siser

A clear film that is designed to yield Full Color logos for application on white or light garments with a softer look. No mask required. Available in matte or gloss finish. Designed for use with UV, Eco-Solvent, and Solvent based inks. Digitally print in reverse, contour cut, weed and heat apply. Heat applications; Preheat garment for 10-15 seconds at 320° F with medium pressure, PEEL HOT.

	15" x 5 YD Roll	15" x 10 YD Roll
Clear - Gloss	**$46.27**	**$89.02**
Clear - Matte	**46.27**	**89.02**

Use: 100% Polyester, 100% Cotton, Poly/Cotton blends.

ColorPrint Evolution by Siser

A high opacity digital media with a matte finish, soft hand, and amazing stretch. No dry time is required, the ink is not cured until it is heat applied. ColorPrint has a pressure sensitive carrier, so it is recommended to place back on the paper carrier. Designed for use with UV, Eco-Solvent and Solvent based inks. Digitally print right reading, contour cut, weed, mask, and heat apply. Use ColorPrint Evolution Mask to transfer the image. Heat applications; Preheat garment for 15 seconds at 320 F with firm pressure, PEEL HOT.

	5 YD Roll	10 YD Roll
White (27.5" W)	**$79.63**	**$156.07**

Xtreme White	11999 XW	**60.05**	54.04	**247.81**	223.02

Fast Fushion White cures at 280 F. No bleed resistance. Excellent stretch properties. Wilflex recommends for polypro bags.

Polywhite is especially formulated to combat dye migration problems on a variety of specialty substrates, like aprons, jerseys, caps; any material with a heavy dye load.

Bright Tiger is a true bright white ink with a wide range of applications. Excellent opacity, fiber mat down, low gloss level and good flash properties. Use as a stand alone white or an underbase.

Bright Tiger HV has the same properties as the regular Tiger, only it's thicker, to provide a heavier deposit of ink for increased opacity.

White Buffalo is an extremely bright white ink with excellent opacity, fiber mat down, low gloss level, & fast flash. Use as a stand alone white or underbase.

Quick White is a new premium ink great as an underbase or as a highlight white. Fast flashing with low tack and excellent fiber mat down, leaving a smooth printing surface. High brightness and a matte finish. Use on 100% cotton or cotton/poly blends.

Xtreme White is smooth and creamy; it flashes fast and prints through fine mesh counts. Use as a first down underbase with flash, or as a stand alone white. Good bleed resistance.

Wilflex Genesis Super Ink

Optimum opacity is achieved with GNS Super Series High Opacity Plastisol inks.
Use same printing parameters as regular Genesis.

wilflex wilflex wilflex

Wilflex Genesis Process Color

Pure, transparent, high intensity colors designed for direct wet-on-wet printing.
Process colors have a soft hand, resist buildup, and minimize dot gain.
Substrates: 100% cotton, cotton blends, on white backgrounds.

Mesh: 305 to 355 Extender: Soft Hand Clear 10140 CLR Tension: 25+ newtons
Reducer: Finesse 10150 FNS Cure Temperature: 330 F Squeegee Type: triple 70/90/70 sharp edge

TIPS FOR BEST RESULTS WHEN PROCESS PRINTING

1) Select as fine a mesh as possible. 2) Keep mesh tension high - at least 25 newtons.
3) Use a sharp, triple durometer squeegee. 4) Use consistent pressure and squeegee angle.
5) Avoid unnecessary flashing.

Wilflex MX Ink Mixing System

The Wilflex MX Mixing System is the easy to use and easy to mix color matching system that produces simulations of Pantone Color Formula Guide Colors. MX mixing inks produce soft-hand inks for high production wet-on-wet printing. Colors will reproduce best on white or light substrates. For darker substrates, use a low-bleed, underbase white.

Custom PMS Plastisol Ink Colors

Custom ink colors are mixed at WSN using a computer color matching system and a high opacity base. Simply select a color from the Pantone Color Formula Guide or send a color sample to Wild Side North.

QT	4x1QT (EA)	GL	4x1GL (EA)	5G
$40.00	$38.00	$75.00	$71.25	$337.50

May assort custom colors for quantity discount (per size)

(Please allow 48 hours lead time for all custom mixed inks.)

The Fine Print: PMS colors are designed for the offset printing industry and for inks to be printed on paper. The system is applied to plastisol inks and comes very close to matching PMS colors. However, since plastisol ink is basically different from offset ink, an exact PMS color match cannot be guaranteed in any plastisol ink matching system.

Wilflex Heat Transfer Plastisol Ink

Transflex Series semi-opaque heat transfer ink for soft-feel, hot-split transfers on white or pastel substrates. Transflex soft inks can also be used for conventional cold-peel transfers. For High-Opacity transfers use Transflex Super. For hot-split transfers peel immediately. For cold-peel wait 10-15 seconds before peeling.

Mesh (standard): 60-86 • Mesh (fine line): 110-195

Extender: None • Reducer: 3-5% (by weight) Reducer #1 • Gel Temperature: 195-230 F

Transfer Temperature: 375 F • Can be used with heat transfer adhesive powders.

Heat Transfer Paper & Accessories

Wild Side North Heat Transfer Adhesive

Powdered adhesive is "dusted" onto wet ink before gelling transfers. Helps hold fine line detail. Transfer process takes less time, temperature, and pressure. Medium Grind (212 Microns)

1 LB	$11.95	5 LB	$49.00

AW Super Trans **For Hot-Split or Cold-Peel Transfers.**

Super Trans is a high release, 60 pound paper with a double sided coating and it is designed for maximum release of both hot split ink and straight plastisol ink. Peel it hot for a "split" release or peel it cool for a total ink release. Works with specialty inks like glitter, shimmer, and plastisol puff.

	Size	500 Sheets	1,000 Sheets	5,000 Sheets
AW Super Trans	12.5" x 12.5"	**$45.68**	**$ 81.82**	**$ 72.21/M**
AW Super Trans	15" x 15"	**63.25**	**113.28**	**106.90/M**

AW Hot-Split 60 **Designed for Hot-Split Transfers.**

This paper allows a consistent and even split of ink close to the surface of the paper to assure maximum ink transfer. It also reduces "feathering" when sublimation inks are used. Excellent size stability assures good results on multi-color transfers.
60 pound paper.

	Size	500 Sheets	1,000 Sheets	5,000 Sheets
AW Hot Split 60	12.5" x 12.5"	**$17.93**	**$32.10**	**$30.30/M**

Jet-Pro Sof Stretch Digital Inkjet Heat Transfer Paper

Make heat transfers of photos with an inkjet printer. Gives a soft, stretchable hand to the transferred image. Works best with light colored substrates with a tight weave. Use with a commercial heat press (hand irons not recommended).
Sheet size 8.5" x 11"

Box 100/**$68**

Teflon Sheet

For heat press vinyl, lettering, and transfer applications.

18" x 20" **$12**

VACUPallet for Heat Transfers

Holds flat stock securely.
Powerful vacuum motor.
Big 18" x 24" print area.
Includes mounting bracket.
Foot pedal activated.

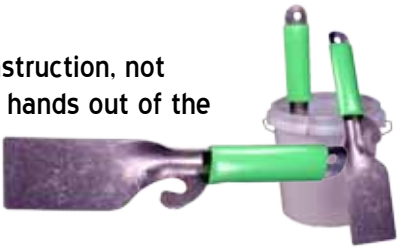
$575

Ink Mixing & Color Matching

Bucket Scoop

A better way to handle your ink. Rigid aluminum construction, not affected by solvents, stores on edge of bucket, keeps hands out of the ink, polyethylene handle, 3" blade scoops lots of ink.

$8.50 EA • **$7.95** EA/6+



Ink Spatulas

Rosewood handle (15" spatulas have plastic handles) with metal blade makes ink dipping easy. Great for stirring, scraping ink from screens and dipping ink from containers.

Learn to Print T-Shirts

Wild Side North

Fundamentals of Garment Screen Printing Workshop

Wild Side North conducts regularly scheduled workshops at its' showroom location in Slippery Rock, PA. The popular workshop, "Fundamentals of Garment Screen Printing" teaches all the basics: plastisol inks, pre-press, press set-up, hands-on printing and screen reclaiming.

- **PLASTISOL INKS**: what they are and how they work; ink additives and modifiers; choosing the right ink for the right garment.
- **PRE-PRESS**: creating graphics; understanding screen frames, mesh, and emulsions. Includes screen coating and screen exposure.
- **PRESS SET UP**: registering multi-color jobs and off-contact printing. Fine tuning the printer to fit the job.
- **MULTI-COLOR PRINTING**: printing production is explained, students get to print on T-shirts, aprons, caps and nylon.
- **SCREEN RECLAIMING**: proper recycling of screens to insure trouble free re-imaging.

$199

The one-day workshop is limited to 4 students, allowing lots of individual attention and "hands-on" learning. Past attendees have come from as far as Louisiana, Oregon, and Puerto Rico. Classes are held from 8:30am to 5pm. Tuition covers the cost of instruction and all materials. Call for upcoming dates and registration form.

Workshop dates listed at www.wildsidenorth.com

image mate

DZ 343

A diazo emulsion for Water Based & Plastisol inks. 1000's of prints with no chemical hardeners and it still reclaims easily. Violet.

DC 521

A value priced, dual cure emulsion for textile and graphics shops. Low viscocity. Excellent leveling. Coats fast with no pinholes. Blue.

PC 701

Possibly the fastest exposing one-part SBQ emulsion. Super high 52% solids mean more build-up with fewer coats. Easy to reclaim. Pink.

Blockout Red 421

An inexpensive, water-based blocker of plastisol, UV, & solvent based inks. Spreads easily over every mesh count and dries fast. Red.

TexTac

A water-based, pressure sensitive pallet adhesive for printing textiles. A single application holds hundreds of garments.

1 gallon = 4 cases of aerosols.

Chromaline Emulsion

Chroma/Tech PL

Pure Photopolymer emulsion. Designed exclusively for plastisol inks. Gives more buildup with fewer coats. Dries quickly and reclaims easily, with no lock-in. (Aqua)

Chroma/Tech PL2

Pure Photopolymer emulsion. For printing textiles with fine detail, halftones, and four-color process designs. Excellent coating on higher mesh counts. (Purple)

Spike CT-420D

Pure Photopolymer emulsion. Optimizes exposures at the 420 nanometer spectral point. Perfect for use with fluorescent UV black lights. (Red)

Magna/Cure UDC-2

Dual Cure Emulsion. A Diazo & Photopolymer mix. Excellent for plastisol, UV and solvent based inks. Fast exposure and excellent definition. Medium viscosity. Good for all mesh. (Aqua or Clear)

Magna/Cure UDC-HV

Dual Cure Emulsion. HV=high viscosity for easy coating on low or high mesh counts. Exposes fast with excellent image quality and superior mesh adhesion. *If you like RLX or TLX, you'll love UDC-HV!* (Purple)

Ulano Chemicals

NEW LOWER PRICES

No.2 Micro Grit Fabric Abrader

An extreme fine powder to roughen mesh fabric for optimum adhesion of stencils to fabric. Use on damp fabric and wash off with cold water.

No.3 Screen Degreaser

Removes dirt, dust, and oils from all fabrics. Ready to use and needs no mixing. Degreases effectively in hard water and rinses clean with hot or cold water.

No.5 Stencil Remover Paste

A ready to use paste that removes direct emulsions and CDF films from all types of fabric. Thicker consistency stays where you put it. No odor and no strong akalis.

No.10 Extra Heavy Blockout

A heavy, water-soluble blockout for use with coarse mesh counts. Can be used for touch-ups when thinned with cold water. Recommended for all fabrics and all stencil systems.

No.23 Fabric Abrader & Degreaser

The abrading action promotes wetting of the fabric and adhesion of the stencil. Its degreasing action removes dust, dirt and oils from the fabric.

No.60 Screen Filler Liquid Blockout

Use full strength or dilute with water.

Cap Film Tips:

1. Thin films are used for finer detail & thinner ink deposits on higher mesh counts.
2. Thicker films are used for lower mesh counts and heavier ink deposits.
3. Ulano states the shelf life of cap film is 15 months.
4. Once applied to a screen, the unexposed shelf life is two weeks.
5. Remove the clear polyester carrier sheet immediately prior to exposing the screen.
6. Underexposing is the major cause of stencil breakdown.

Ulano Emulsion

QTX

Ultra fast pure photopolymer for textile applications. Provides superior coating properties. Better bridging on rough mesh and fast drying. High Solids content. No mixing! (Pink)

QLT

Ready to use, ultra fast exposing SBQ photopolymer direct emulsion formulated for imprinted textile printing. High viscosity, high solids content, fast drying. (Blue)

QX-1

A 'Hybrid' dual-cure emulsion. Combines the convenience, speed and shelf life of a photopolymer with the durability and imaging properties of a dual-cure. High solids & easy reclaiming. No mixing. (Blue/Green)

TLX

Multi-purpose dual-cure emulsion with exceptional exposure latitude, edge definition and resolution. High contrast coloration facilitates inspection of the stencil prior to printing. (Green)

RLX

Multi-purpose dual-cure emulsion. Excellent bridging on course mesh. Fast drying. High solids content provides more buildup per coat. RLX is recommended for imprinted sportswear. (Magenta)

Proclaim™

Dual-cure emulsion. Solid performer in less than ideal conditions. Fast drying, good buildup, high solids content. Forgiving of poor fabric preparation. Easy to reclaim even if underexposed. (Blue)

	List GL	WSN GL	WSN 4 x 1GL(EA)	List 5G	WSN 5G

The pot life of sensitized emulsions is 4-6 weeks. The shelf life of a coated screen, properly stored is up to four weeks for Diazo and Dual-Cure emulsions and 6 months for Pure Photopolymer emulsions. Moisture impairs the photosensitivity of emulsion. Emulsion must be completely dry prior to exposing. The emulsion can feel dry to the touch, but moisture may still be present and lead to underexposure.

Ulano RUBYLITH

40" x 150" Roll **$55.06**

Aluminum Frames Pre-Stretched

Aluminum frames last a lifetime and hold tension longer. Rigid and bow resistant. Welded corner joints. 1.5" x 1.5" profile. Easy to clean and reuse.

Squeegees

Squeegee handles available in wood, plastic and aluminum. Squeegee hardness is referred to as "durometer", with 60 being softer and 90 harder. Softer squeegees deliver more ink and harder squeegees deliver less ink and allow finer detail. Blade is available in single durometer and triple durometer which is a sandwich of 60 or 70 outside and 90 in the middle. Most textile printing is done with 70 durometer.

All handles are screwed (not glued) for easy blade replacement.

Sleeve & Leg	4" x 18"	37	54	70

Cherokee Rubber White Pallet Sheeting

Protect your wooden and aluminum pallets with this synthetic polymer sheeting. Applies to existing pallets. Prevents heat buildup during long spot cures, helps prevent warping. 1/8" thick, 36" wide.

Use Sprayway #92 Hi-Temp Heavy Duty Adhesive to glue pallet sheeting to pallets.

$35/FT

VACUPallet for Heat Transfers

Attaches to your manual press in seconds. Holds flat stock securely. Powerful vacuum motor. Big 18" x 24" print area. Includes mounting bracket. Foot pedal activated. This item drop ships.

List: $600	WSN: $575

Camie Aerosols

375 Flash Cure Adhesive

An adhesive that is designed for the screen print industry. It holds most all textile products. A clear mist spray made for the rapid heat cycles, like those in the flash cure process.
14 OZ.

380 Screen Printers Adhesive

380 is a pressure sensitive pallet adhesive that will not stain. It offers quick tack, has low soak-in and will not wrinkle textiles. It is great for making short-term bonds and releasing from textiles.
14 OZ.

385 Webbing Adhesive

A clear pressure-sensitive webbing adhesive that will not wrinkle the work while in use. Specifically designed for sweatshirts, fleece and other thick garments.
12 OZ.

480 Screen Opener

Works great for unclogging screens and loosens plastisol inks on screens. It works quickly, so as to cut back on down-time on screen printing.
15 OZ.

$ 39 GL
$169 5G

Tekbond TB-HV

A water-based pallet adhesive. Apply manually to pallet. Fast Tacking • Non-aerosol No V.O.C.'s • High Viscosity

$ 7 8 OZ
$18 32 OZ

TexTac

A water-based, pressure sensitive pallet adhesive for printing textiles. A single application holds hundreds of garments. Apply manually or with Upol gun. 1 gallon = 4 cases of aerosols.

$32.82 GL
$31.10 4 x 1GL(EA)

Upol Gun

Automotive quality sprayer applies TexTac water based pallet adhesive. A special spray nozzle emits fine controlled mist of TexTac for optimum performance and economy. Requires a 4 PSI of compressed air. A money saving solution compared to aerosol sprays. **$169**

Sprayway Aerosols

382 Mist Adhesive
Perfect for textile screen printers. Will not transfer to fabric. The number one seller.

383 Web Adhesive
Ideal for sweatshirt & heavier fabric. Thicker spray stream. Will not transfer to fabric.

84 Flash Adhesive
An industrial grade spray adhesive with excellent heat resistance. Specially formulated for flash-curing.

957 Fast Open Screen Opener
Opens dried areas of screens. For use with all types of inks.

40 Glass Cleaner
Keeps exposure table glass sparkling. Great for all glass products.

945 Silicone Spray
Spray on shirt side of screen to prevent pick-up of ink when doing wet-on-wet printing.

Sprayway®

Sprayway®

Sprayway®

211 Adhesive Activator
Spray on stretch & glue frames to speed drying of mesh adhesives.

63 C-60 Degreaser
A solvent cleaner that removes grease, dirt and oil. Great for cleaning moving parts on presses. Leaves no residue and is fast drying.

201 Plastic Clear Fixative
A clear acrylic protective coating on artwork, proofs, and photos. Spray on ink-jet film to make positives waterproof.

92 Hi-Temp Heavy Duty Adhesive
A contact adhesive for use where high strength and heat resistance are needed. Great for gluing pallet sheeting.

208 Toner Aide
Improves opacity of laser printed positives. Darkens toner, 100% transparent. Dries in minutes.

32 Fast Open Water Based Screen Opener
Opens up dried areas on screen.

RhinoTech Screen Cleaning & Reclaiming

Screen Wash RhinoClean SW145
TOP SELLER! A great solvent for degrading plastisol inks. Distilled from orange peels with a pleasant citrus scent and priced right.

Screen Wash RhinoClean SW175
Great all-purpose solvent mixture. Removes most inks including mylar & epoxy. Perfect for ink recirculation systems. Moderate evaporation and minimum odor.

Press Wash RhinoClean PW115
An economical all purpose solvent mixture with a medium evaporation rate. Leaves no residue.

Press Wash RhinoClean PW125
An aggressive press wash for plastisol, UV, and conventional solvent based inks. Dries fast and leaves no residue.

Emulsion Remover ER8500L
Same as ER8550L only this one is concentrated. Dilute with water up to 15:1. One gallon makes 16 gallons of emulsion remover.

Emulsion Remover ER8500P
This powder concentrate is sold by the pound. Mix it with water and one pound makes 32 gallons of emulsion remover.

Emulsion Remover ER8550L
Use straight from the jug to dissolve all types of liquid emulsion and capillary film. Use a trigger spray bottle to apply.

RhinoTech

Call for Drum pricing on Rhinotech Products.

Mesh Degreaser Liquid DG2200
Very effective and not expensive, this strong detergent removes any residue from mesh after reclaiming. Apply with trigger spray bottle. Can be diluted 4:1 with water.

Haze Remover HR2400
HR2400 removes tough ink stains and ghost images. Apply to mesh with trigger spray bottle, scrub then rinse.

Easiway Polypropylene Dip Tanks

Time Saving - Less Effort - New More Powerful Formula

The dip tank is the best and cheapest way to use EasiStrip SUPRA. Cleans emulsion and ink residue from screens.

Step 1. Clean excess ink from the screen with spatula or pallet knife. No need to clean ink residue.

Step 2. Place the screen in dip tank with Easistrip Supra solution. (1 part Supra to 5 parts water). Allow 1-2 minutes to soak.

Step 3. Pressure wash the screen from the print side. Ink and emulsion are gone.

Steps 4 & 5. Spray Easisolv 201 or 701 on screen and scrub with pad to remove any stains. Pressure wash to rinse.

EASIWAY SYSTEMS, INC.

Franmar Sceen Cleaning & Reclaiming

FRANMAR Soybean Based Solvents.

A Safer Way to Clean, Reclaim and Dehaze Screens without the odor.

BEAN-e-doo™ Textile Ink Cleaner

Biodegradable screen wash for textile ink.

BEAN-e-doo is made from natural soy spirits and has no odor. Quickly removes ink and tape residue from screens.

GREENEWAY™ Textile Ink Cleaner

Biodegradable screen wash for textile ink.

GREENEWAY is made from natural soy spirits and has no odor. Quickly removes ink but will not loosen screen tape. Mix 50/50 with water to extend product.

Strip-e-doo™ Emulsion Remover

A thick, fast-acting liquid emulsion remover that stays in place as it removes all types of emulsion. This biodegradable reclaimer is non-caustic and non-toxic.

d-Haze™ Haze Remover

Safely removes haze and ghost images from screen mesh. This biodegradable soy product has no noxious vapors and will not irritate skin.

d-Haze GEL™ Haze Remover

Thicker formulation stays where you apply it and will not 'run'. Removes ink haze and ghost images. Can also be used to remove mesh adhesive from screen frames.

d-Grease™ Screen Mesh Degreaser

Removes oil, dust, dirt, and solvent residue from reclaimed screen mesh. Get screens squeaky clean for optimal reuse.

Color Change™ Screen Wash

This clean and safe soy product removes plastisol ink on press for quick color changes. One ounce or less cleans the ink from a standard screen.

Ickee-Stickee-Unstuck™

Use Ickee-Stickee to remove pallet adhesive and to clean spray adhesive residue from printing equipment. If your press looks like a CHIA PET then you need Ickee-Stickee.

FRANMAR BEAN-e-doo™ vs. GREENEWAY™ What's the Difference?

BEAN-e-doo is nearly pure soy solvent and is highly effective on ink and tape residue. It can be rinsed with water but is not water soluble. GREENEWAY is a blended soy solvent and can be diluted up to 50% with water to dissolve plastisol inks. It is less oily than BEAN-e-doo and can be used full strength as an on-press cleaner.

FRANMAR Textile Chemicals Quart Trial Kit

A great way to try the FRANMAR line of screen printing products. Kit includes one quart each of BEAN-e-doo, GREENEWAY, Strip-e-doo, d-Haze, d-Grease, and Ickee-Stickee; plus 3 scrubby pads, 1 pad handle, and 2 trigger spray nozzles.

$69.95

Scrubbing Pads & Handles

The most economical way to apply screen cleaning and reclaiming products. Pads won't absorb liquid so it stays on the screen, not in a rag. Pads are available in Beige or Blue. *Handles and pads are sold separately.*

AccuRIP Software

AccuRIP allows you to print halftones with Epson Inkjet Printers. One copy of AccuRIP is all you need to print from ALL YOUR COMPUTERS. That's right, Setup AccuRIP on one network and "share" the AccuRIP print driver. No need to load any software on the other computers, those users just choose AccuRIP as a network shared printer and print. Simple. This is a huge cost savings. One Software, One Price for all your computers. Unlimited network use. For use with the following EPSON printers:

AccuRIP-D 1280, 1400, 1520, 1800, 1900, 2200, 2400, 3000, 3800, 4000, 4800, 4880.
AccuRIP-EX (Wide Format) 7000, 7600, 7800, 7880, 9600, 9800, 10600, 11880.

AccuRIP-D $495 **AccuRIP-EX $795**

AccuRIP™

All Black Cartridge Sets for Epson Printers

The ALL Black Cartridge System loads 600% or more ink in the Epson Inkjets!

Screen printers only need black for film positives. The All Black System gives you black ink in much greater volume! It dramatically reduces time between cartridge replacement. Offers user flexibility, use all for maximum efficiency or one at a time. Greatly reduces or eliminates nozzle clogs. Allows the printer to performas it was designed to, with cartridges, not dummy cartridges that stress the printer. Advanced software code allows the printer to focus multiple cartridges to a tight location for greater quality and accuracy on film positives. Insert each cartridge from the ALL Black Ink System into the appropriate slots (they are clearly marked). AccuRIP will instruct your Epson printer to lay down black ink from all inkjet heads.

Numbering Systems

Numbering Stencils...as Easy as 1 2 3

This efficient numbering method allows you to direct print numbers on most fabrics without investing in expensive numbering equipment. These inexpensive stencils adhere to the screen on the printing stroke and are thrown away after printing the number. The next stencil is then adhered to the screen in the same fashion with no adjustment or clean up of the screen between numbers.

Order in sets or by individual number and size. One Set includes 200 each #1. 100 each # 0, & 2 thru 9. 100 each Spacer (for two digit numbers)

	4"	6"	8"	10"
Standard Block Set	$117.73	$116.64	$144.56	$190.44

HIX Heat Presses

HT-400P 15" x 15" Platen

The industry standard for 25 years. Features digital temperature controller, digital thermometer and digital countdown timer. With full range pressure control and heat indicator light.

Model# 70303 •120V
12.5 Amps
1,500 Watts
Ship WT 84 LBS

HT-600P 16" x 20" Large Platen

Features digital temperature controller, digital thermometer and digital countdown timer. With a large platen size for big heat transfers, full range pressure control, and heat indicator light.

Model# 70305 • 120V
14.5 Amps • 1,750 Watts
Ship WT 95 LBS

Presto 15 15" x 15" Platen

Weighs only 47 pounds for easy portability. Great for "on-site" printing or use as a backup press. Has a temp. control & heat indicator light. Battery timer.

Model# 14729H
120V • 12.5 Amps
1,500 Watts • Ship WT 65 LBS

Presto 20 16" x 20" Platen

Adjustable pressure control with full range thermostat and heat indicator light. Battery timer.

Model# 14745H • 120V
14.5 Amps • 1,750 Watts
Ship WT 90 LBS

Swingman 15A 15" x 15" Platen

Swing away design for easy access to print area. Battery timer.

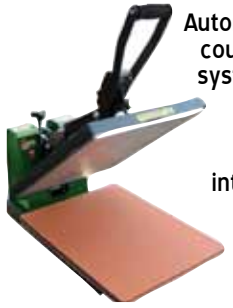
Model# 69723H
120V • 12.5 Amps
1,500 Watts
Shipping WT 68 LBS

Swingman 20D 16" x 20" Platen

Swing away design for easy access to print area. Digital time and temperature control. Full pressure adjustment, heavy duty even heating.

Model# 71005 •120 V
14.5 Amps • 1,750 Watts
Ship WT 108 LBS

S-650P Auto Release 16" x 20" Platen



Automatically opens after timer countdown with gas shock lift system. Features digital timer, digital temp. controller, and digital pressure readout. Optional 15" x 15" interchangeable lower platen.

Model# 32230 • 120V
14.5 Amps • 1,750 Watts
Ship WT 95 LBS

B-250 Hat Press

Includes pressure adjustment, thermostat (0-450F), heat indicating light and handy cap hold down device. 3" x 5.5" heat platen.

Model# 67032H • 120 V
4 Amps • 450 Watts
Ship WT 31 LBS

N-680D Digital Semi Automatic 15" x 15" Platen

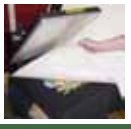
Digital timer and fully adjustable pressure control (pneumatic). Up to 89 PSI of inline pressure. Digital temperature (0-450F). Long lasting pneumatic air cylinder lift system. Lower the handle to start the automatic cycle. Air compressor and water separation trap required. ETL-US certified.

Model# 70134 • 120 V • 12.5 Amps • 1,750 Watts • Ship WT 126 LBS
Optional pre-press switch available.

N-880D Digital Semi Automatic 16" x 20" Platen

Digital timer and fully adjustable pressure control (pneumatic). Up to 89 PSI of inline pressure. Digital temperature (0-450F). Long lasting pneumatic air cylinder lift system. Lower the handle to start the automatic cycle. Air compressor and water separation trap required. ETL-US certified.

Model# 70119 • 120 V • 14.5 Amps • 1,750 Watts
Ship WT 137 LBS • Optional pre-press switch



Teflon Sheet for heat press vinyl, lettering, and transfer applications. 18" x 20"

HIX Equipment

HG-3612 Gas Convection Conveyor Dryer

HG-3612 is the most energy efficient gas convection-air conveyor dryer on the market today. The 36" x 12' belt/chamber configuration has an 85,000 BTU burner that reaches a maximum temperature of 400 degrees. Precise curing temperature is set with a digital temperature controller and an analog belt speed control. Safety switches control temperature, combustion recirculation and exhaust to allow for continuous worry free operation. Built for easy maintenance the 3612 filters are easily accessible for cleaning. 110V or 220V (60 HZ, 1 Phase).

	Volts	Item #	EACH	Crating
HG-3612	120	66664	$13,995	$300
HG-3612	220	66672	14,100	300

NPII-3616 Infra-Air Premier Conveyor Dryer

NPII-3616 is a high production dryer featuring bottom air recovery and re-circulating air knives throughout the drying chamber. Perfect for your direct-to-garment operations the 3616 eliminates the need for more expensive gas conveyor dryers. This multi-purpose dryer can handle water-based textile inks as well as traditional plastisol and solvent-based evaporative inks. Utilizing a unique combination of infrared and forced air drying technology the 3616 delivers 58,251 BTU's of drying capacity.

Overall Length - 16' • Belt Width - 36" • Unit Width - 52" • Oven Length - 132" • Infeed - 48" • Exit - 48"
Variable 2000CFM •50 Amps 3-Phase • 88 Amps 1-Phase • 17.1 KW/58,251 BTU

SD-2632 Screen Drying Cabinet

Coated screens get to work faster with the HIX SD-2632. 8 adjustable frame rails hold screens up to 26.5" x 32.5". Air is filtered, heated, and delivered through slotted air knives to evenly dry each frame. Unit features a thermostat to control cabinet temperature plus a individual fan switch and heat switch, so the unit can be operated with or without extra heat. Fan displaces air at 100 CFM. Watt heater draws 7 Amps.

Manual Textile Printers

Odyssey Series Manual Rotary Textile Printer

Odyssey manual printers may be value-priced but they are built to the Workhorse standard with tubular steel construction and a 2" diameter center shaft with tapered roller bearings. No wimpy sheet metal and sheet metal screws on this machine. Standard equipment on each printer includes Micro-Registration, Adjustable Screen Angle and Adjustable Off-Contact. Modular construction allows for expanding the 4-Color/4 Station to either a 6/4 or 6/6. Standard pallet size is a generous 15" x 18".

Flashback Curing Unit

Flashback Curing Unit

Be more productive with a smaller, less expensive machine.

Print-Flash-Cool All on one print head.

STOCK ITEM

After the print stroke, Flashback slides its thin quartz element in between the garment and the screen. The printed image is instantly flash cured and then cooled. A heat reflector focuses the heat on the garment while protecting the screen. This is combined with built-in Turbo Air Fans to keep the screen and ink cool. There are 5 sizes of flashback available to fit all Workhorse machines, from Freedom to the Javelin. (16" x 18", 20" x 22", 22" x 27", 24" x 36", 41" x 32")

See the Freedom 6/8 with FLASHBACK on display at Wild Side North.

WSN conducts free seminars on the Introduction to Automatic Screen Printing. Call for details and schedules.
